

## Patchworks update February 2022

Dear Resident

### Construction progress

Work at Patchworks is now gathering pace. Following completion of piling for the first two buildings, we have now commenced with the groundworks for these buildings.

The photo above shows one of the giant core bases that will provide the base of the stairs and lift shafts to Block A. It will take some 250M3 of concrete, weighing over 500T to construct.

Two tower cranes will be delivered on site this week. These cranes will enable us to construct Block A and C and will remain on site throughout the year.

### Limiting the impact on the local community

We are committed to reducing the impact of our operations on the local community.

To minimise the volume of mud and dirt leaving site, all lorry wheels are jet washed before exiting. This is managed by the gateman on site. A ramp at the site entrance directs water into the installed gullies as shown in the photos below.

### **Keeping the community updated**

Noticeboards have been installed on Hawker Place and Forest Road to provide an additional source of information. The boards include contact details for the site team as well as information about the project. The noticeboards will be updated regularly with site progress photos.

### **Contact us**

We have updated our email address. Our new email is [patchworkswalthamstow@inlandplc.com](mailto:patchworkswalthamstow@inlandplc.com). You can also message us via the online form on our website.

Yours sincerely

**Nigel Cunningham**  
**Senior Site Manager**
